

Fixing Text box clipping on ActivInspire Flipcharts and Windows 10

So your Flipchart looked like this on your Previous Window OS ?

(Windows 7)

And now it looks like this ?

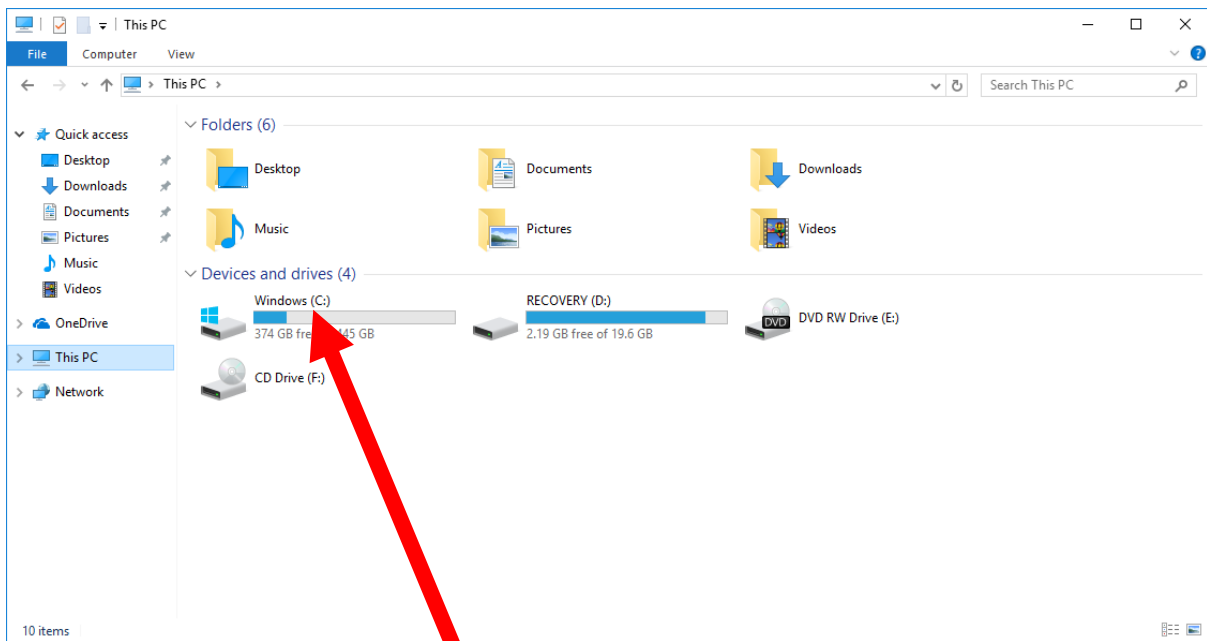

(Windows 10)

Let's fix it in 10 Easy Steps !

1. Close ActivInspire and then press the Left Windows Key and while holding down, Tap the E key.

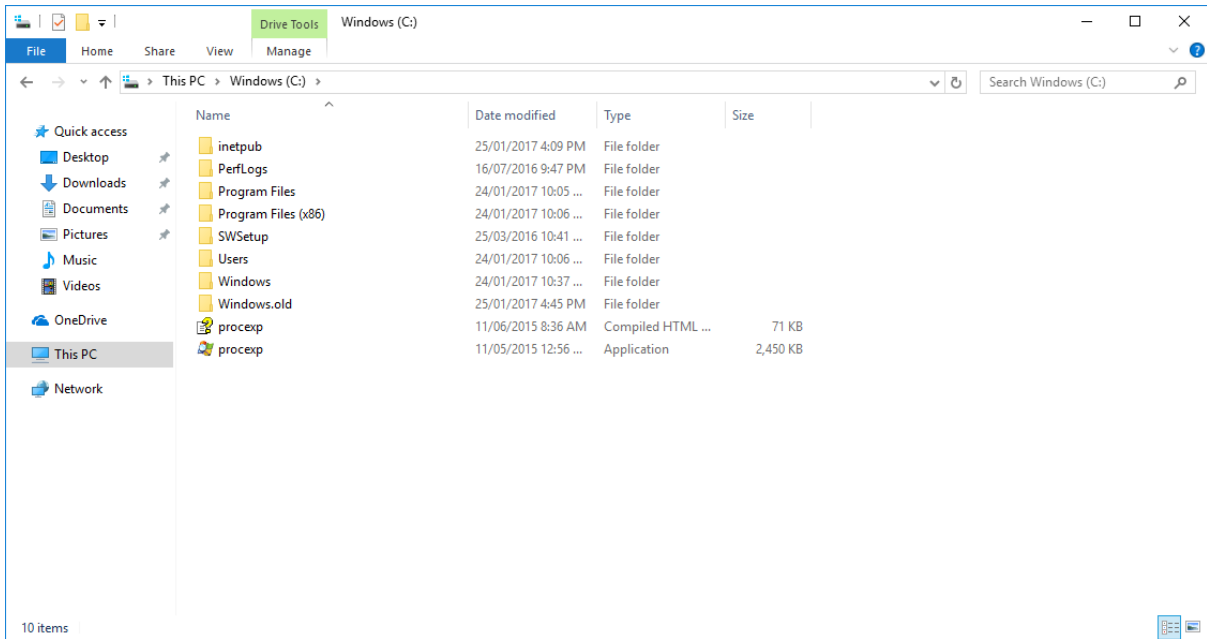

This will bring up Windows Explorer. Let go of the keys.

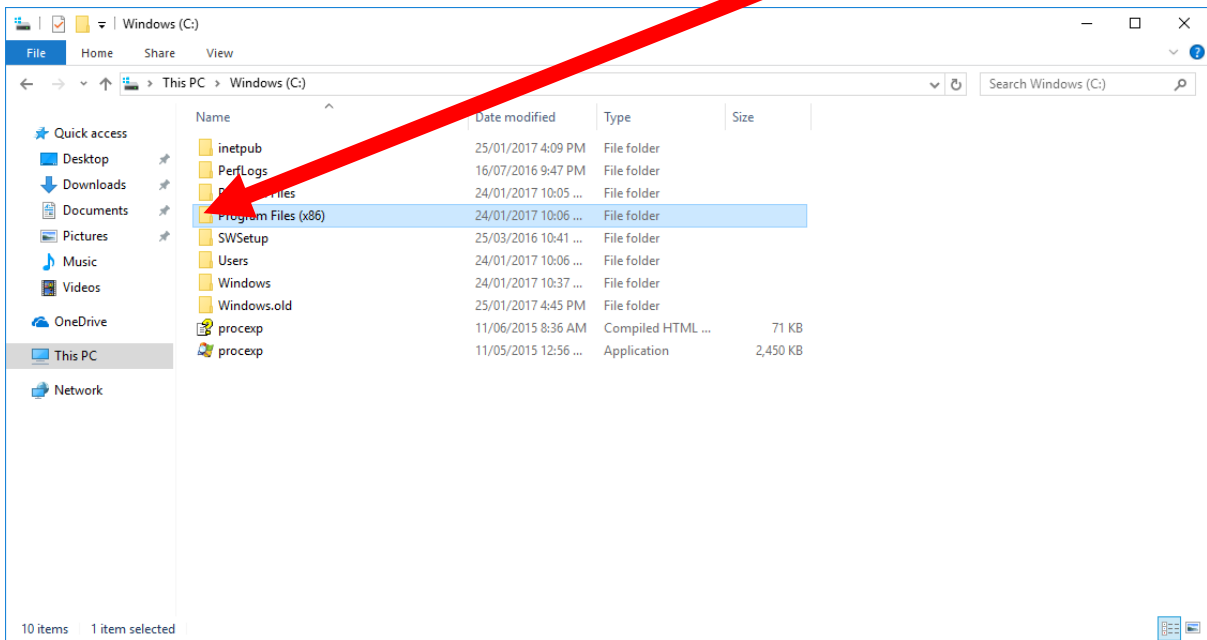

2. Double click on the C drive (Yours may not be named Windows)

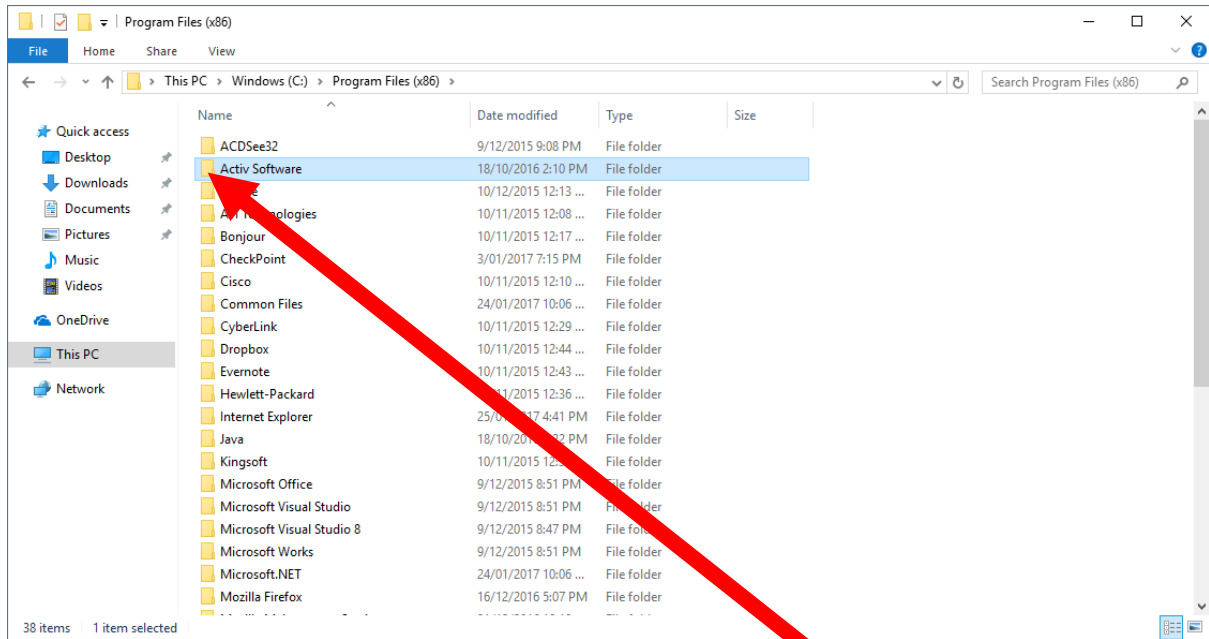

You will now see this

3. Double click your Left Mouse button on the Program Files (x86) folder

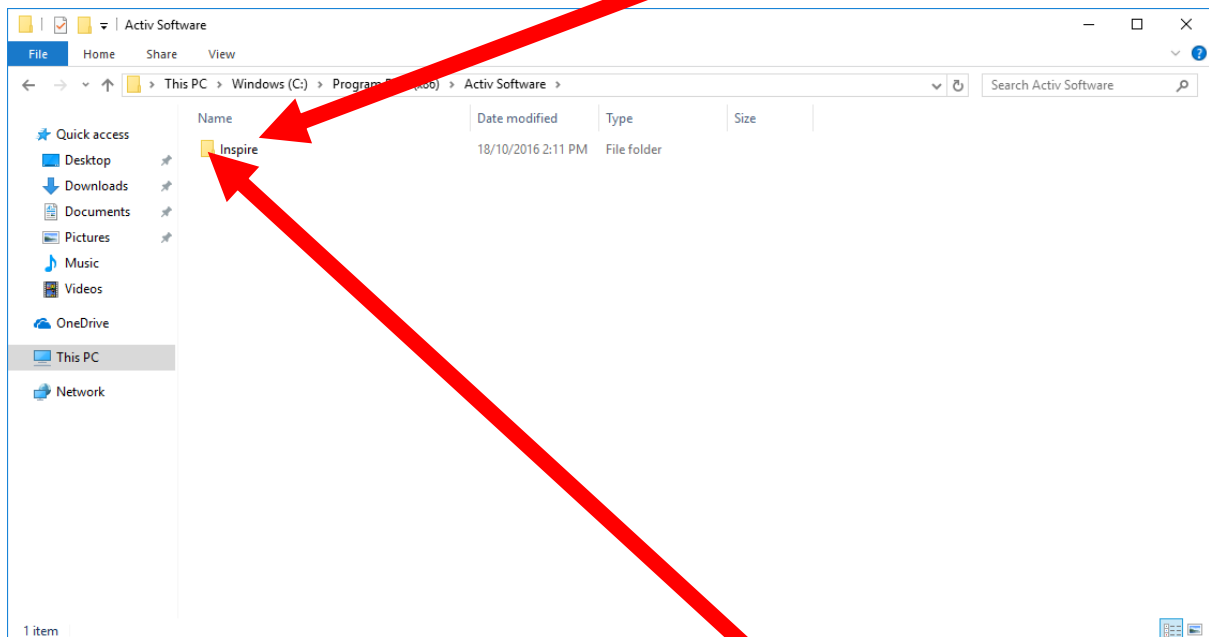

You should now see this

4. Double click your Left Mouse button on the Activ Software folder icon.

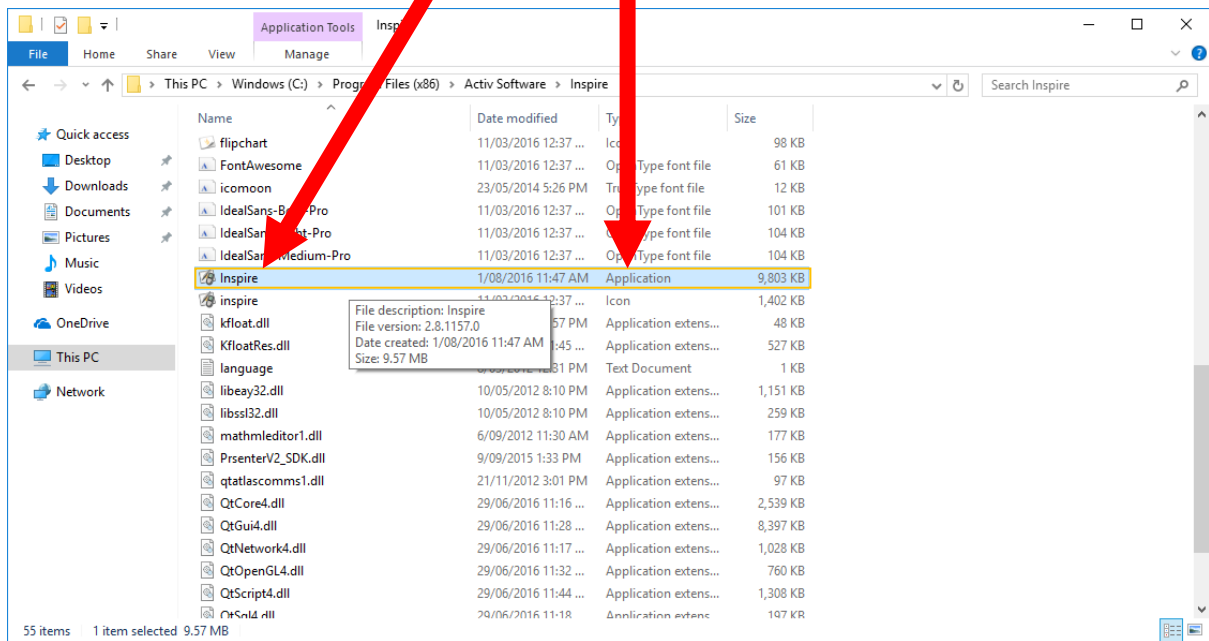

You should now see this.

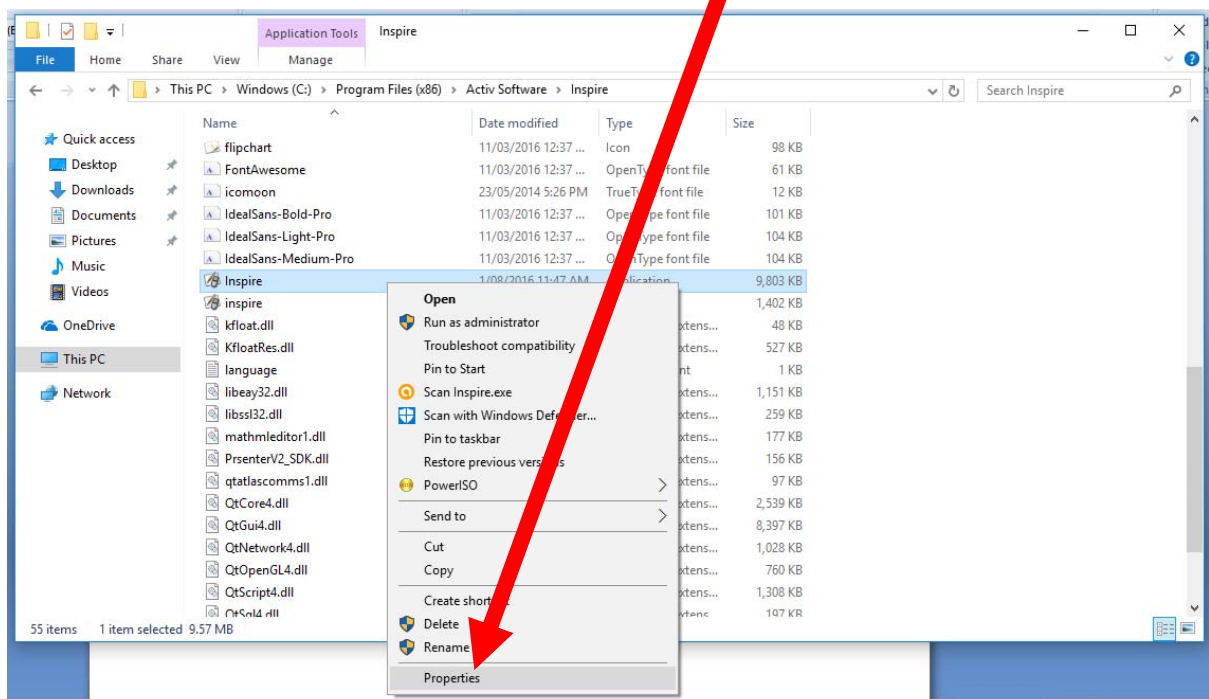

5. Double Click with your Left Mouse button on the Inspire folder icon

You should now see this.

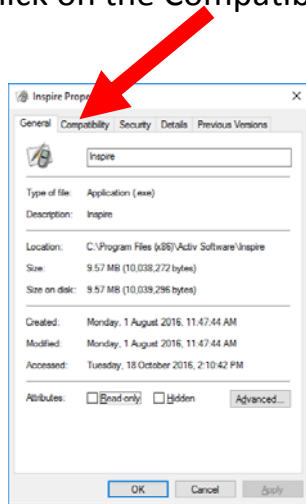

6. Right click once on the Inspire **Application** file (Not the Inspire Icon file)

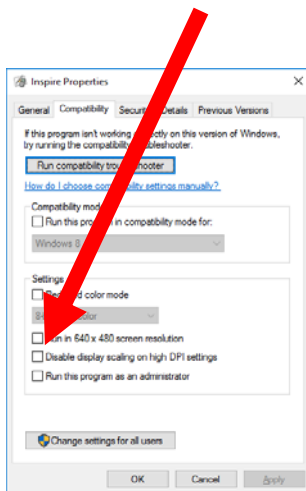

7. Left click on Properties.

8. Left click on the Compatibility tab.

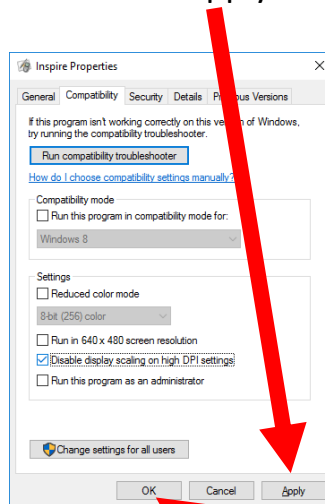

9. Left click on *Disable display scaling on high DPI settings* tick box.

You should now see this.

10. Click on Apply

.....and then OK.

You can now try ActivInspire and see if the Clipping issue is fixed.

Please let us know if the issue persists
